1.0 RULES AND REGULATIONS

1.1 ORGANIZATION AND PURPOSE

The Bid Depository System was formally organized in 1966 in Saskatchewan. The System was first adopted in 1955 and 1956 in Canada, to provide the Construction Industry with a uniform and practical system for Subcontractors to submit their tenders to the General Contractors. In Saskatchewan there are four local Bid Depositories which operate under the management of the applicable Construction Association as well as two drop off locations.

The cost for the operation of the System, which includes administration and the printing of the envelopes, is offset by the sale of the standardized envelopes to those using the System on the various projects specifying the Bid Depository System.

The System is generally accepted by all levels of Municipal and Provincial Governments, as well as the design profession, other owners and tendering authorities.

1.2 NAME

1.2.1 The company shall be known as the "Saskatchewan Bid Depository Incorporated" (SBDI).

1.3 PLACE

1.3.1 The Saskatchewan Bid Depository Incorporated may operate a Bid Depository at each place in Saskatchewan where there is a Construction Association.

1.4 PURPOSES

1.4.1 The purposes of the Saskatchewan Bid Depository Incorporated are:

1. To establish a system to improve tendering practices in the construction industry.
2. To protect the sanctity of bidding by making provision for the reception of sealed tenders from Subcontractors and Sub-subcontractors and the delivery of firm quotations in writing to General Contractors,
3. To provide adequate time for General Contractors to compile their bids completely and accurately, on the basis of firm written quotations.
4. To provide procedures for the handling of bids which are in the best interest of Owners, Architects, Engineers and Contractors.

1.5 SASKATCHEWAN BID DEPOSITORY INCORPORATED

1.5.1 The Saskatchewan Bid Depository will be administered by a Provincial Board of Directors, made up of representatives of the Construction Associations and the Industry.

1.5.2 The Board of Directors is made up of the following representatives: Saskatoon Construction Association – two; Regina Construction Association – two, Moose Jaw Construction Association – one; Prince Albert Construction Association – one; Saskatchewan Association of Architects – one, and a Chairman elected at large.

1.6 SBDI BRANCH MANAGEMENT COMMITTEES

1.6.1 At each location where a Bid Depository exists, there is an SBDI Branch Management Committee consisting of at least three members of the local Construction Association. This Committee shall, pursuant to the SBDI User's Manual, arbitrate all complaints and disputes.

Users Manual

3.7 DEFINITION – TENDERING AUTHORITY

3.7.1 For the purposes of the SBDI User's Manual, the "Tendering Authority" will refer to the party who has called for tenders on any given project.

3.8 DEFINITION – SBDI AUTHORITY

3.8.1 For the purposes of the SBDI User's Manual, the "SBDI Authority" will refer to the SBDI Branch responsible for closing a project.

3.9 DEFINITION – SBDI BRANCH OF RECORD

3.9.1 For the purposes of the SBDI User's Manual, the "Branch of Record" will be the branch where the closing should have taken place according to the SBDI boundary map.

3.10 DEFINITION – SBDI DELIVERY BRANCH

3.13 GUIDE TO USING THE TRADE SCOPE DEFINITIONS

3.13.1 Trade Scope Definitions have been prepared by the SBDI and various trade associations to identify work to be included or excluded in the bids for trades listed under the Trade Scopes of the SBDI. Tabulating items to be included in a bid provides a common basis for which bidding becomes truly competitive and fair to all concerned.

3.13.2 Become familiar with the contents of the SBDI User's Manual.

3.13.3 Specify the items in scopes corresponding to the Trade Scope Definitions, as all bids will be based on these definitions. Discrepancies, omissions and duplications will be minimized if this procedure is followed in conjunction with Rule 4.4.13 "Where an item falls within a Trade Scopes' specification section, that item will be picked up by that Trade Scope unless it falls within another Trade Scope or is specifically excluded by that Trade Scope."

3.13.4 Know your Trade Scope Definitions and those of related trades, which may influence items to be included or excluded from your bid.

3.13.5 Regardless of where an item appears in the tender documents for a project, the Trade Scope Definitions govern whether or not it should be included in your bid as set out in Rule 4.4.13 "Where an item falls within a Trade Scopes' specification section, that item will be picked up by that Trade Scope unless it falls within another Trade Scope or is specifically excluded by that Trade Scope."
